

PRESS RELEASE

FOR IMMEDIATE RELEASE

CSL becomes the first mobile operator to offer fully integrated "F-Secure Mobile Security Service" in Greater China

**Delivering comprehensive protection to empower a safe
mobile computing experience**

Hong Kong, March 26, 2008 – F-Secure Corporation, the global leader in providing security as a service through mobile operators, today announced a partnership with Hong Kong CSL Limited (CSL), Hong Kong's largest mobile operator, to offer CSL customers F-Secure's award winning security solution through CSL's "F-Secure Mobile Security Service". Under the agreement, CSL will be the first mobile operator in Greater China to provide F-Secure's fully integrated on-device protection and automatic over-the-air security updates to its customers under the 1010 and One2Free brands.

Jari Heinonen, Vice President for F-Secure Asia-Pacific said, "CSL's 'F-Secure Mobile Security Service' will transform the mobile industry and change how mobile security software is delivered. F-Secure has a unique and successful track record of assisting mobile operators to reinforce their security service. By using an innovative update system via the mobile network, CSL and F-Secure can now offer a simple and effective solution to enhance users' surfing experience and enjoy a safe online trading environment. We are pleased to be able to expand our offering for mobile phone users with CSL."

Dr. Tony Seeto, Director of Product and Business Development for CSL, commented, "We are pleased to be the first mobile operator in Greater China to offer a fully integrated mobile security service empowered by F-Secure. Being a leading provider, we are constantly taking initiatives to enhance customer experience, and be the first to offer the latest and best-of-breed services to our users. Our partnership with F-Secure enables us to provide our customers with cost-effective, hassle-free and proactive security solution in protecting their devices from unwanted attack, particularly when customers increasingly use their mobile devices for data applications and connections to the internet."

CSL's "F-Secure Mobile Security Service" allows 1010 and One2Free customers to experience the full potential of their devices while being protected. This user-friendly application contains a comprehensive set of security features to protect against mobile malware, viruses, spyware and other unwanted attacks which can transfer through Bluetooth, infected memory card, and/or PC by data synchronization. 1010 and One2Free customers can now also enjoy carefree use of all online activities and take full advantage of their opportunities in today's networked world.

CSL's "F-Secure Mobile Security Service" will be available to all 1010 and One2Free customers through a 5-month free trial from mid April, 2008. Customers can subscribe to the service via WAP, 1010 Centres or CSL's hotlines. The service, which combines an integrated antivirus and firewall, will be pre-installed in Nokia Symbian S60 2nd and 3rd edition devices, Windows Mobile 6 Professional and Standard PDA phones, and Sony Ericsson UIQ devices. Users can also download it directly over the air to their phone and enjoy immediate protection against mobile malware.

CSL's "F-Secure Mobile Security Service" will be available at HK\$18 per month which includes all local data charges.

-Ends-

About F-Secure Corporation

F-Secure Corporation protects consumers and businesses against computer viruses and other threats from the Internet and mobile networks. F-Secure's award-winning solutions are available as a service subscription through more than 160 Internet service providers and mobile operator partners around the world, making F-Secure the global leader in this market. The solutions are also available as licensed products through thousands of resellers globally. The company aspires to be the most reliable security provider, helping make computer and smartphone users' connected lives safe and easy. This is substantiated by the company's independently proven ability to respond faster to new threats than its main competitors. Founded in 1988 and headquartered in Finland, F-Secure has been listed on the OMX Nordic Exchange Helsinki since 1999. The company has consistently been one of the fastest growing publicly listed companies in the industry. The latest news on real-time virus threat scenarios is available at the F-Secure Data Security Lab weblog at <http://www.f-secure.com/weblog/>.

About CSL

CSL is the largest mobile network operator in the Hong Kong communications market. The Company launched its mobile services in 1983, and today operates a world-class GSM / WCDMA network. In April 2006, a joint venture company, CSL New World Mobility Limited to own Hong Kong CSL Limited and New World PCS Limited, was formed. The Company markets its services to various segments through its mobile brands: 1010, One2Free and New World Mobility.

CSL introduced its 3G and Wi-Fi services in 2004 and HSDPA in 2006, and has pioneered the launch of HSCSD, GPRS, MMS, EDGE, Video Sharing and "3G Mobile TV" in Hong Kong. For more information about CSL, please visit www.hkcs.com.
