

Immediate Release

NEW HTC TOUCH DIAMOND2™

SIGNALS A NEW WAVE IN COMMUNICATION

New phone simplifies information access with HTC Push Internet™ and unify personal communication with single-view contact integration

Hong Kong — April 15, 2009 — HTC Corporation (TAIEX: 2498; "HTC"), a global designer of mobile phones, today unveils the latest flagship device, the HTC Touch Diamond2™. HTC is also extremely pleased to announce that Hong Kong's leading mobile operator, CSL Limited, has been appointed the exclusive Hong Kong distributor and operator partner of the HTC Touch Diamond2™. Integrating innovative simplicity with unique style and an intuitive interface, HTC Touch Diamond2™ balances function, form and cutting-edge technology to personalize the communication and mobile Internet experience.

"The HTC Touch Diamond2™ introduces a mobile communication experience that simplifies how we communicate with people in our lives whether through voice, text or email," said Peter Chou, president and CEO, HTC Corp. "HTC is delivering the latest, cutting-edge sophistication in a broad portfolio of mobile phones that improve how people live, work and communicate."

Mr. Aenil Premji, Chief Marketing Officer of CSL Ltd said, "CSL is delighted to be the sole distributor of the innovative HTC Touch Diamond2™. With the brand new HTC Touch Diamond2™ on CSL's Next G, the fastest All-IP mobile broadband network in the world with unmatched indoor and outdoor coverage in Hong Kong, we will bring our customers a complete business and personal lifestyle experience at any location. We are looking forward to more cooperation with HTC in the future, so that together we can address the needs of the market with exciting new mobile devices and services that fulfill the promise of the mobile lifestyle."

HTC TouchFLO™ 3D Integrated with Windows Mobile®

The HTC Touch Diamond2™ utilizes HTC's latest TouchFLO™ 3D interface. TouchFLO™ 3D has been more deeply integrated into a customized version of Windows Mobile® 6.1 to deliver more consistency throughout Windows Mobile® applications and menus. Focused on making navigation easier and more intuitive, TouchFLO™ 3D brings important information to the top-level user interface, including quick access to people, messaging, email, photos, music and weather. As part of this improved Windows Mobile® integration the touch focus areas have been enlarged to be more finger-touch friendly.

Bringing People Together

With the HTC Touch Diamond2™, HTC is introducing a new people centric communication approach, providing a single contact view that displays the individual conversation history of contacts regardless of whether voice, text or email were used. This can be viewed from the contact card or the in-call screen during a phone conversation, ensuring the latest communication contact-by-contact is always at hand.

Simplifying How People Access Their Information

Continuing its commitment to making the mobile Internet easier and more enjoyable, the HTC Touch Diamond2™ introduces HTC's Push Internet™ technology. HTC Push Internet™ alleviates slow downloading and rendering of Web pages on a mobile phone. Users can pre-select their favorite Websites to get immediate access to them when needed.

More Powerful Yet Compact and Elegant

The HTC Touch Diamond2™ is the next step in the evolution of the successful HTC Touch Diamond™. Crafted to fit perfectly into the hand, the Touch Diamond2™ evolves the compact design and iconic style of the original HTC Touch Diamond™. It incorporates a larger 3.2-inch high-resolution wide-screen VGA display for a greater viewing area in a design just 13.7mm thick. The phone also includes a new touch sensitive zoom bar for even faster zooming of Web pages, emails, text messages, photos or documents.

Leveraging HTC's TouchFLO™ 3D experience combined with a people centric communication approach and HTC's new Push Internet™ technology, HTC Touch Diamond2™ offers an advanced touch experience that is optimized for one-hand use.

With fifty-percent better battery life*, a five mega-pixel auto and touch focus camera, expandable memory, gravity sensor and an ambient light sensor, the Touch Diamond2™ brings the most sophisticated capabilities to a broad consumer audience looking for the professional benefits of a smartphone without sacrificing size, looks or functionality.

*Subject to network and phone usage
