

Setup Guide

(for Symbian Anna Supporting Handsets)

1. PCCW Wi-Fi Auto Connect1 Setting

PCCW-HKT mobile service brings you an exclusive “Auto Connect” function!

With simple setup, your device will automatically connect from mobile data to Wi-Fi when PCCW Wi-Fi is detected, without logging in Wi-Fi everytime, save time and enjoy a high speed surfing experience!²

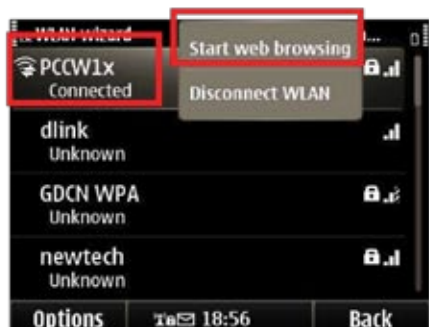

Go to “Settings”

Select “Connectivity”

Select “WLAN”

Select “PCCW1x”, and then select “Start web browsing”

You will see the Wi-Fi symbol at the top of the screen after completion

Remark: Please ensure you are staying under Wi-Fi coverage for Wi-Fi Auto Connect setup

1 Applicable to “Auto Connect” package subscribers with selected tariff plans

2 If moving out of Wi-Fi coverage, handsets will auto connect to mobile data.

2. Manually Connect or Disconnect to Local Mobile Data Setting

You can enable or disable the local mobile data function on your device by following the steps below:

Go to "Settings"

Select "Connectivity"

Select "Settings"

Change to "Always ask" in "Data use in home country"

Select "Connect this time" if you want to have pop-up alert next time.

Select "Cancel" if you want to disconnect data network

3. Manually Disconnect to Roaming Data Setting

To avoid unnecessary data roaming charges, you are advised to turn off automatic connection to mobile data capability (above Section 2) and data use when abroad function before departure.

Go to "Settings"

Select "Connectivity"

Select "Settings"

Change to "Always ask" in "Data use when abroad"

Select "Cancel" if you want to disconnect roaming data network
